Nicole Cirino, MD

Presenting from Baylor College of Medicine

Learning Objectives

- Recognize the clinical presentation of postpartum psychosis and its impact on maternal health and child safety.
- Examine the prevalence of postpartum psychosis, OCD, suicide, and homicide in the perinatal period and briefly discuss the justice system in postpartum psychosis cases.
- Distinguish between intrusive thoughts and psychosis in the perinatal period, highlighting the differences in symptoms and treatment.
- Identify pathophysiology of postpartum psychosis, current theories, and evidencebased treatment strategies for reducing symptoms.
- Collaborate with members of the interprofessional healthcare team to assess safety, distinguish postpartum psychosis from intrusive thoughts, and coordinate timely treatment, referral, and support for postpartum patients and their families.

If you have CME/CEU questions, please email OPDACE@TTUHSC.EDU for assistance.
